

Glass Ampoule sealing torch

(NIN/ST/12/Ampoule sealing/2017-18/7331-7336)

Proposed application: Semi-Automatic Apparatus for Sealing Ampoules

Operation : semi-automatic for use with natural gas and compressed air

Features: The system should consist of torch, regulators for gas and air, air pump, Manual flow adjust valve to set air and gas flow.

The system is designed for hand operation with gas and air supply laboratory.

Specifications:

Torch : Twin jet type

Air pump : Oil free air pump to supply 0-0.25 bar (3.6psi)

Regulator : Suitable regulator to supply gas and air to the unit.

Valves : Thumb adjust smooth valves for gas and air flow.

Stand Type : Height adjustable stand to keep ampoules of different sizes.

Operating voltage : AC 230volts, 50Hz.
